

TD B114 – Mineral Insulated Cable Fixings

Cable clips

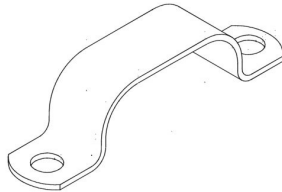

A range of copper cable clips is available. These are suitable for fixing a single cable and have one fixing hole.

They are supplied open ready for fixing.

They are available either as plain copper or LSZH coated. Standard colours are orange, red or white. Other colours to order.

For details see TD B102 – MI cable clips and saddles

Saddles

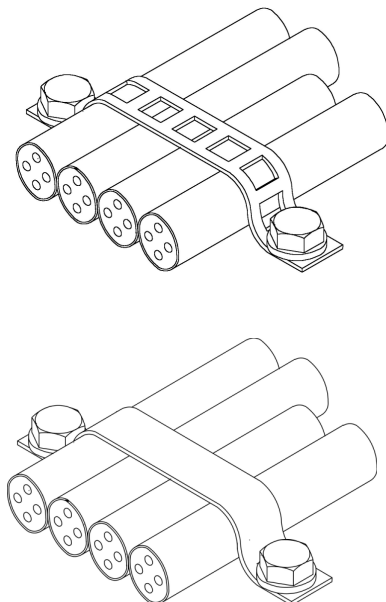

A range of copper saddles is available. They are used to secure two cables side-by-side and have two fixing holes

They are available either as plain copper or LSZH coated. Standard colours are orange, red or white. Other colours to order.

For details see TD B102 – MI cable clips and saddles

Strapping

For fixing multiple runs of cable a perforated copper fixing strip is available. It is 1mm thick and is supplied in 5 m rolls in two widths, 12 and 18 mm. It is punched with 6.65 mm square holes that eliminate the problems associated with inaccurate bending which results when using round holes.

It is available as either plain copper or LSZH coated.

Standard colours are orange, red or white. Other colours to order.

An un-punched version is available to special order
